Dated : 29 July 2020

**SUBJECT - CONVERSION OF EXISTING SINGLE POINT CONNECTION TO
MULTIPOINT CONNECTION**

Dear Sir,

In reference to your notice dated 17.07.2020, we are hereby submitting our response and also have some requests regarding the same. You are requested to consider the below points regarding document submission (Ref. Annexure-I, para 1):

(a) Our architect who knows all the details regarding load calculation for all the common services like common area lighting, tower lifts, water pumps etc. is unable to come our office and his own office is also closed due to COVID-19. We have mailed him all the required details and are waiting for the reply.

(b) There are 438 flats in this society and due to the Corona pandemic, most of the residents are at their home towns as they are working online so we are waiting for them to come back in order to gather the complete information of all the residents.

(c) All the information mentioned in annexure -1 para (c) and (d) will be submitted along with the 51% consent of the owners/allottees, once collected. We are working on this and taking confirmation from all the residents by letter and email.

Also, please clarify whether the cost of the meter includes the complete wiring cost (which will be laid during installation of meter) or it will be charged separately.

You are requested to extend the time duration for document submission considering the current pandemic situation. We will submit the required details as soon as we get them.

Thanking you,
Your faithfully,

Harishchandra Singh(FM)
